SITUATION SUMMARY

Weather of Concern

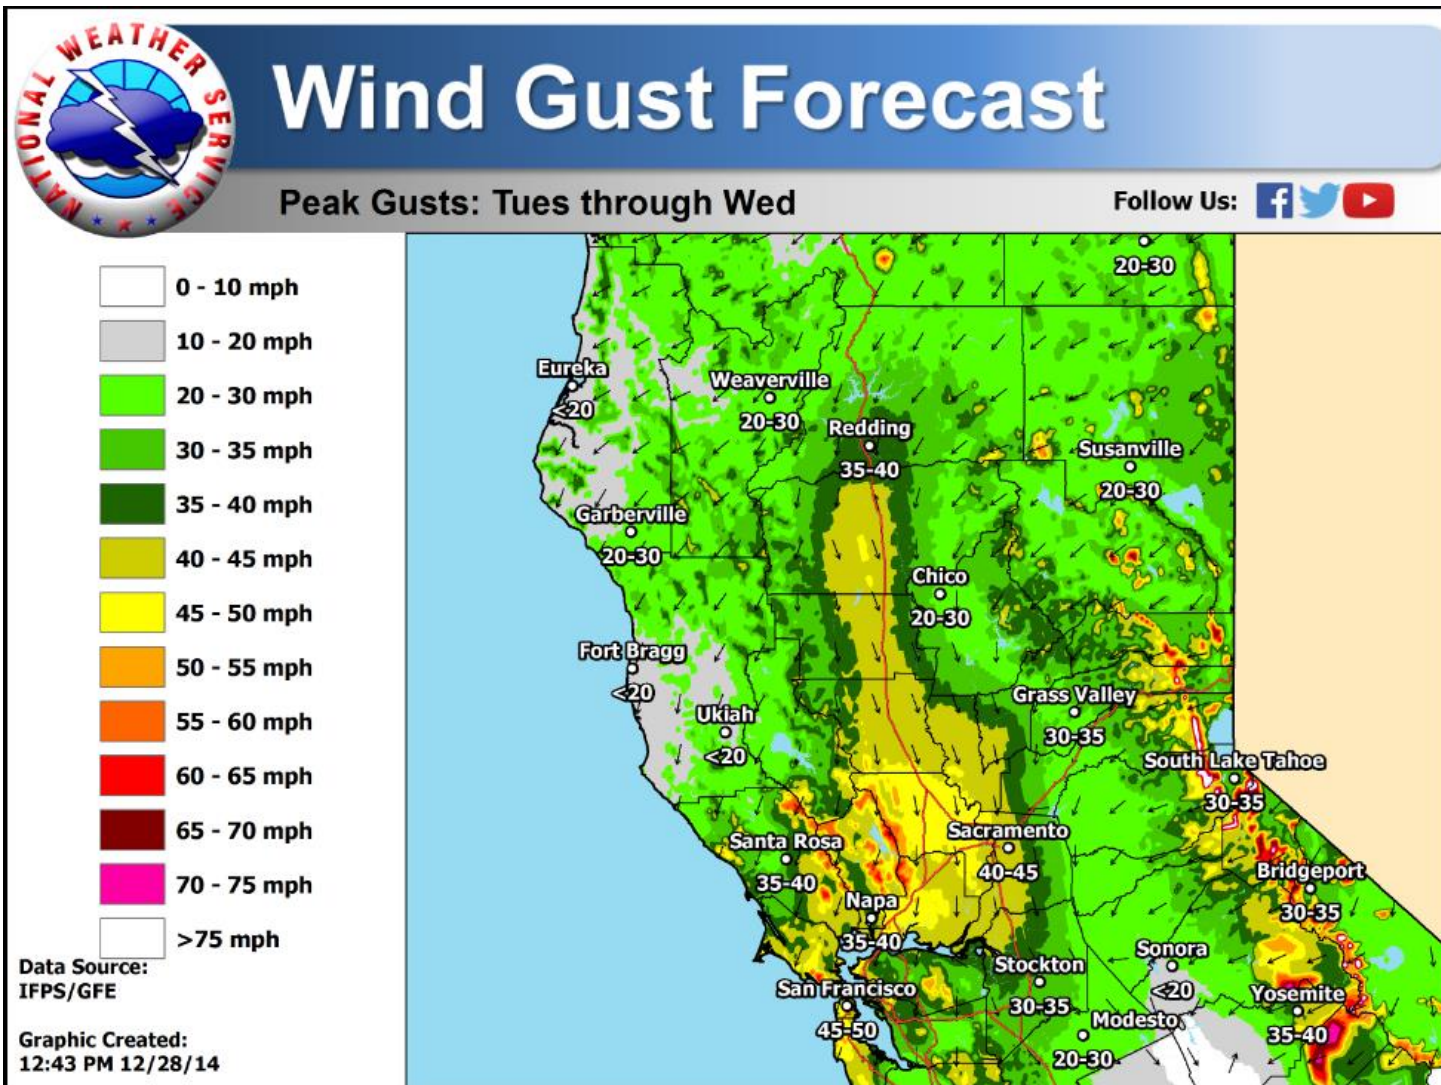

- A Chilly and Windy End to 2014
- A cold upper low will move over California during the middle of this week.
- For Northern California, a few showers will be possible across the interior, with light snow accumulations possible along the Sierra. However, the bigger impact will be the north winds that develop Tuesday into Wednesday. Trees remain drought-stressed may be more susceptible to being toppled than normal. The strong north winds are also an atypical direction for Solano County, and could lead to exacerbated downed tree issues.
- For Southern California, rain is going to be the problem in elevations below 2500 feet with snow above that level. Travel headaches are sure to be the rule on New Year's Eve.
- Snow expected in Southeast California Deserts and Mountains Tuesday through Wednesday afternoon. Up to 2 inches in most desert locations, including Joshua Tree National Park and the I-5 Grapevine, and 4 to 6 inches over higher elevations. Snow levels will drop to 2000 feet by early Wednesday morning.
- Winter Storm Watch in effect from Tuesday afternoon through Wednesday afternoon for the Los Angeles, Riverside, San Bernardino, San Diego and Ventura County Mountains
- Winter Storm Watch in effect from Tuesday afternoon through Wednesday afternoon for Joshua Tree National Park in San Bernardino and Riverside Counties.
- Winter Storm Watch in effect from Tuesday afternoon through Wednesday afternoon for the Kern County Desert and Mountains
- High Wind Watch in effect from Tuesday afternoon through Wednesday afternoon for the North Bay and East Bay Hills and the Santa Cruz Mountains.

WEATHER

WEATHER SYNOPSIS BY REGION:

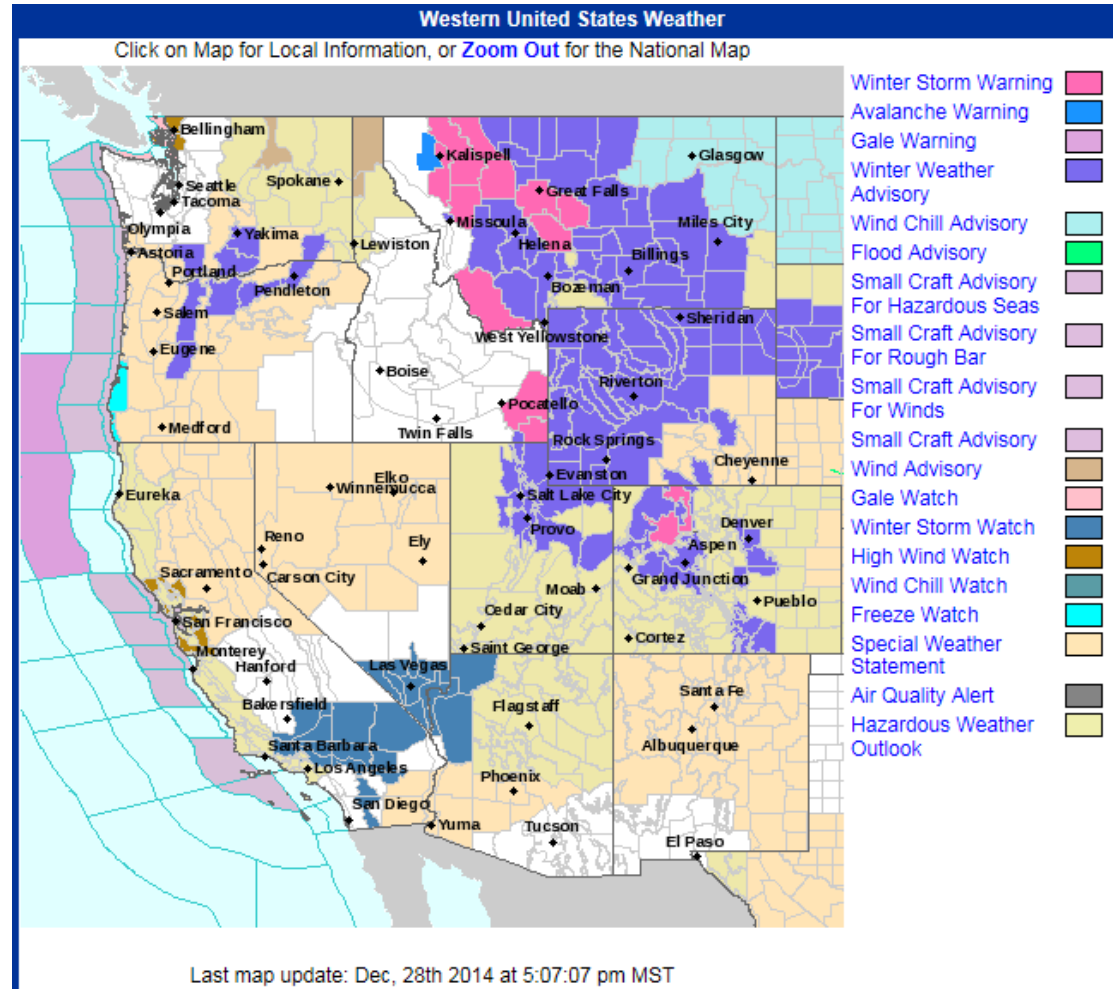

NORTHERN CALIFORNIA

Dry with seasonal temperatures today under light northwest flow. High clouds will spill over the area today but the system producing them will remain well offshore thanks to a high pressure system just off the coast. A low pressure system dropping in to the Great Basin will bring a threat of showers to the northern mountains and Sierra/Cascade Range late Monday into Tuesday with a chance of showers at the lower elevations south of about the I-80 corridor. As this system passes southward, strong north winds will develop most areas. The strongest winds will occur Tuesday afternoon through Wednesday. Lighter winds and drier conditions return Wednesday.

SOUTHERN CALIFORNIA

Periods of gusty northeast winds will continue along the coastal slopes of the mountains and adjacent foothills areas this morning. Lighter winds and below average temperatures today and Monday. For Tuesday through Thursday of next week, a very cold Canadian storm system will bring periods of precipitation and strong winds with well below average temperatures.
